

# Compact Unit CB-Series

CB All-in-One  
Trim Handling System

# CB-Series All-in-One Unit

## Efficiently capture, cut, convey, and collect waste.

The CB-100 is a versatile and compact unit designed for handling various types of waste from machines. With a robust build, it can easily move between machines, transporting trim up to 35m and disposing it into a 900-litre bag.

### Key Features

#### Silent Operation

With its innovative design incorporating big silencers within a sealed steel enclosure, the CB ensures silent operation, making it suitable for placement within the production environment without causing disruption.

#### Flexible Mobility

The CB's sleek design allows easy movement with a forklift or pallet jack, effortlessly passing through most factory doors. Adapt to your space with a width of just 800 mm and a height of 2,150 mm.

#### User-Friendly Controls

No complex PLC or HMI – just straightforward push buttons and a speed dial. Operate with ease and precision, enhancing your workflow without unnecessary complications.

#### Extended Operation

With a 900-litre bag capacity, enjoy longer operation times between bag changes. Need continuous operation? Our endless bag kit, easily closed with cable ties, keeps your workflow seamless.

#### Accessories

- Oil mist system, for trim handling with glue.
- Antistatic kit, for trim with high static charges.
- HEPA filtration kit, for even better return air filtration.
- Endless bag kit, for continued operation.
- Level sensor with light tower kit.

## Available Models

The CB unit comes in 2 models (2 kW or 4 kW) and 3 standard versions each, including basic, antistatic, or matrix options.

### Basic

- ✓ Ideal for paper and foil trim.
- ✓ Decreases waste volume.
- ✓ Makes waste more recyclable.
- ✓ Improves process efficiency.

### Anti-Static

- ✓ Ideal for flexible packaging.
- ✓ Simplifies recycling due to downsized waste.
- ✓ Keeps production dust free.
- ✓ Allows waste to be reused as pellets.

### Matrix

- ✓ Ideal for sticky materials.
- ✓ No more lifting heavy matrix rolls.
- ✓ Fewer production stops.
- ✓ Maintains constant web tension.

## Explore the Benefits of an All-in-One Solution

- Efficient extraction of **irregularly shaped matrix** forms at high speeds.
- Continuous waste extraction **minimizes production stops** and eliminates matrix breaks.
- Reduced labor costs by **eliminating manual waste handling**.
- Lower material costs with the ability to **reduce trim width** to a minimum.
- **Enhanced cleanliness** in the production area.
- Improved **24/7 non-stop production** process.
- Integrated cutting module **reduces waste volume**.
- **Low energy consumption** due to an energy-efficient radial blower.
- **Minimal maintenance** costs.

### Lean Production

Streamline your production waste collection.

### Plug-and-Play

Connect to your machine and start collecting.

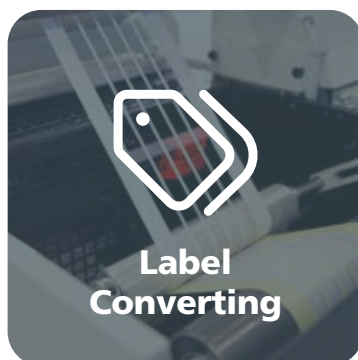

### Small Footprint

Compact design creates a small footprint.

# Industry Applications

The CB-series All-in-One Unit is a highly mobile cutting and extraction solution designed for handling non-adhesive or self-adhesive edge trims, die-cut pieces, and matrix.
