

CB-1000.1

The CB-1000 product family incorporates different inline cutting and extraction systems for non-adhesive and self-adhesive edge trims, die-cut pieces or matrix from a single production line up to smaller machine groups.

The unit can be delivered with one 1000l PE-bag, a roll container or an octabine as collection device.

Single parts:

- ☉ Machine frame for the material separator
- ☉ Inline cutter(s) or cutter module(s)
- ☉ Transportation fan (power frequency controlled)
- ☉ Piping silencer
- ☉ Electrical control cabinet incl. frequency converter
- ☉ Material separator according application
- ☉ Filter plates with filter class G4
- ☉ Pipe system

Options:

- ☉ Oil spray system
- ☉ Anti static system
- ☉ Gate valve for bag changes
- ☉ Endless bag
- ☉ Ultrasonic-reflex feeler
- ☉ Professional dust filter system
- ☉ Air return system
- ☉ Sound control housing for the fan

System principle:
